Abstract:

The present invention discloses a learning pedagogy system and method thereof, which comprises, but not limited to, a user device with a memory unit, and a graphical user interface having internet or without internet; and a processor, in which processing divided into various training module and validation module and operative to a plurality of layers for: building lexical repertoire by a set of vocabulary providing a creative usage from the set of vocabulary; discreet trainer module interventions; providing further improving the set of vocabulary while making a plurality of sentences in the learning pedagogy.
