(57) Abstract :

A semi-automated fabric stitching device comprising a body 1 having a first end 2 installed with multiple primary-rollers 3 wrapped with different threads for stitching, a screen 4 mounted on the body 1 for selecting color of thread, multiple members 5 assembled with multiple rotatable units 6 integrated within the body 1 for translating a free-end of user-desired thread towards a second end 8, a needle 7 positioned at the second end 8 via a slider 9 for translating/positioning the needle 7 in a manner to engage the thread within a hole 10 crafted on the needle 7, a platform 11 equipped with multiple secondary-rollers 12 are wrapped with threads for positioning the fabric for stitching, an opening 13 crafted on the platform 11 to pass a free-end of the thread for stitching and multiple wheels 14 arranged over the platform 11 for movement of the fabric.
